ROOF MAXX®

MORE LIFE. LESS MONEY. GUARANTEED.

August 20, 2020

To All Interested Parties,

Roof Maxx is an all-natural solution applied with low pressure to asphalt shingles. Roof Maxx has carefully analyzed the warranties of all major shingle manufacturers, including, but not limited to, GAF, CertainTeed, Owens Corning, TAMKO, and Iko.

As part of this review and evaluation, Roof Maxx has received numerous legal opinions from leading construction and contract attorneys regarding the scope of manufacturers' warranties and specifically how the application of the Roof Maxx product affects these (warranties). Moreover, the largest shingle manufacturer has formally stated that coatings/penetrants applied to their shingles does NOT void their warranty (see attached).

As such, Roof Maxx has concluded, and is confident that, its product neither limits nor voids any manufacturer's warranty. To demonstrate its confidence in this conclusion, Roof Maxx will, at its sole expense, challenge any denial of a warranty claim due to the application of Roof Maxx.

Should you have any questions or require additional information, please feel free to call me at your earliest convenience. I remain,

Sincerely,

Chris McClurg

TECHNICAL ADVISORY BULLETIN

GAF — Quality You Can Trust... From North America's Largest Roofing Manufacturer!™

To: GAF Residential Sales, GAF Contractors, GAF Field Services

From: Technical Services Department

Issued Date: 05/06/2011

Revised Date: 08/26/2016

Subject: Field Coating Of Installed GAF Asphalt Roofing

No: TAB-R-2011-151

Is My Warranty Affected If I Field Apply A Coating To My GAF Asphalt Roofing Shingle?

No, the GAF Limited Warranty for the shingles will remain in effect. However, any damage, such as but not limited to curling, cracking, splitting, or blistering that results from the application of the coating is the responsibility of the owner and is excluded from GAF's responsibility under the terms of our Limited Warranty.

GAF clearly indicates that field coatings **DO NOT** violate their warranty unless such coating causes damage to the shingle. Roof Maxx has been safely applied for nearly ten (10) years without any claim or evidence of any shingle damage, discoloration, or other adverse effect(s). Additionally, Roof Maxx provides a five (5) year Warranty (unlimited transfers) (https://roofmaxx.com/faqs/). Roof Maxx's Warranty is in place even if the manufacturer's warranty has lapsed or is void due to transfer restrictions.

Roof Maxx has carefully evaluated all major shingle manufacturer's warranties, noting the same or similar wording regarding what is not covered in their warranties. Roof Maxx DOES NOT void any manufacturer's warranty.

Roof Maxx was developed by Battelle Laboratories (Columbus, Ohio – https://www.battelle.org/), tested by PRI Construction Materials Technologies (Tampa, FL – https://www.pri-group.com/), and results analyzed by The Ohio State University. The results clearly showed that in all 5 major shingle test categories, Roof Maxx was safe and effective.
